**Subject:** RE: Call with EPA on LNR

Ed feel free to forward this email to anyone that you had cc'd.

Agreed, this meeting is "are we close or not" as opposed to getting into the weeds (thus the absence of my technical folks from the invite), so you aren't derailing any plans. I'll contact Sara and dial back the call to myself Sara and perhaps Corey or Jim.

Since this is moving at a tremendous clip Sara invited a few other folks so EPA can be as responsive and collaborative as possible in the next few weeks. Corey is Sara's Branch Chief for State Standards (Jim his Associate BC) and Mario is our R7 liaison on this effort. Betsy is Sara's counterpart and directs the Division charged 304(a) development. Jacques helps work on these efforts. All of these folks and I have been working extremely hard this past week on what I described to you over the phone.

Just contact me if you have other thoughts throughout the day otherwise we will talk with you at 2:30.

Jeffery Robichaud  
Acting Director, Water Wetlands and Pesticides Division, Region 7  
United States Environmental Protection Agency

Subject: Call with EPA on LNR

Jeff, I wanted to give you a head's regarding the meeting today. I don't recognize many of names of the folks that EPA has slated, but the focus may have shifted from what was originally intended when you set up the meeting. Because of the timeframes that we are under, our purpose for today's meeting is not a detailed technical discussion, but more of a general "are we close or not" discussion with EPA staff, as a follow up to our meeting with Lee Forsgren earlier this week. We would be happy to have a more detailed rule discussion, which would include our technical resources from the University of Missouri, next week or as soon as it can be arranged.

I realize that may be derailing your plans a bit, but wanted to make sure you know what our intentions are going in.

If you have any questions feel free to reach out to Chris or myself. I can be reached this morning at 573-418-5562. Thank you.
